

University of Pennsylvania CPHHD Mission

- 1) Study the complex interaction of biological, clinical, behavioral, and environmental factors predictive of outcomes following a prostate cancer diagnosis.**
- 2) Evaluate how these factors explain disparities in prostate cancer outcomes by ethnicity.**
- 3) Disseminate this information to at-risk populations and the public health community.**

Relationship of Projects to the Continuum of Prostate Cancer Events

Proj.	Screening → Diagnosis → Treatment	Outcome	Project PI
1	B, PE, SE	Screening	J. Holmes
2	B, G, SE	Clinical	T. Rebbeck
3	B, PE, SE	Health Care	K. Armstrong
4	B, C, P, SE	Quality of Life	C. Hughes

B = Behavioral, C = Cultural, G = Biological/Genetic,
 P = Psychosocial Factors, PE = Physical Environment,
 SE = Social Environment
